Summary

Data Scientist with 3+ years across statistical research, signal processing, and applied machine learning. Turns noisy data into decision-ready insights through causal inference, time-series modeling, and feature engineering. Rapidly adopts new technologies and uses AI coding agents with hands-on ownership from architecture through validation.

Skills

Statistics & ML: Causal Inference, SEM, Mixed-Effects Models, Bootstrap, PyTorch, scikit-learn, XGBoost

Data & Languages: Python, R, SQL, pandas, NumPy, SciPy, MATLAB

Backend & Infra: JavaScript/TypeScript, Bash, FastAPI, Flask, PostgreSQL, Docker, REST APIs, Git, Linux

AI-Assisted Engineering: Claude Code, OpenAI Codex; agent orchestration, code review, testing, validation

Experience

Laboratory Engineer

Mar 2025 – July 2026

Ben-Gurion University, Faculty of Health Sciences

- Managed lab instruments and protocols across concurrent university courses.

Researcher & Lead Statistical Analyst

Oct 2022 – Jan 2025

Beer Sheva Mental Health Center — PTSD Research Lab

- Led SEM and bootstrap analysis of 123 Nova festival survivors for a *World Psychiatry* study; identified a mediation pathway accounting for up to 43% of the association. [Publication](#) · [Code](#)
- Mentored students in thesis methods, data pipelines, and code review.

ML Instructor — Neural Networks

Jan 2022 – Dec 2024

Freelance

- Taught CNNs, backpropagation, and neural-network implementation to 30 B.Sc./M.Sc. students.

Signal-Processing Researcher

Sept 2021 – Sept 2022

Brainsway — Deep-TMS R&D Lab

- Built a multichannel clinical time-series pipeline, integrated multi-source data, and trained research staff.
- Derived a spectral phase-lag feature associated with stimulation timing ($r = 0.49$, $p = 0.015$). [Technical Deck](#) · [Code](#)

Selected Projects

Combinatorial Search Engine

[Demo](#) · [Code](#)

- Built a tested, CI-backed Python solver that searched Peg Solitaire's 187M-state space using D_4 symmetry, identifying 1.68M winning states.

Full-Stack Event Platform

[Demo](#) · [Code](#)

- Built and deployed a FastAPI/PostgreSQL platform for 400+ participants, with race-condition-safe transactions and stateless authentication.

Education

Technion, Certified Data Scientist in Machine Learning & Deep Learning

2024–2025

· GPA 91.5/100

Ben-Gurion University, M.Med.Sc. in Medical Sciences

2022–2024

· GPA 95/100 · Thesis: Conducted and analyzed a preclinical study of treatment effects in a rat PTSD model.

Ben-Gurion University, B.Sc. in Psychobiology

2019–2021

· GPA 89.5/100
